A screenshot of a Java applet window titled "Register/Edit User Information". The window contains several input fields and buttons. The fields are for "User ID", "User name", "E-mail address", and "Security level". The "Security level" field is a dropdown menu currently showing "General user". Below these fields is a "Set password" button. A horizontal line separates this section from the "Windows user name" field, which contains the text "bbb". Below this is another horizontal line, followed by "OK" and "CANCEL" buttons. At the bottom of the window is a status bar that reads "Warning : Applet window".

Register/Edit User Information	
User ID :	<input type="text"/>
User name :	<input type="text"/>
E-mail address :	<input type="text"/>
Security level :	General user ▼
<input type="button" value="Set password"/>	
<hr/>	
Windows user name :	<input type="text" value="bbb"/>
<hr/>	
<input type="button" value="OK"/> <input type="button" value="CANCEL"/>	
Warning : Applet window
